Neil Bird: 082 855 0035

Echo and Topfloor/SECURI-WALL has now been used in several actual projects. When something new is launched into the market everyone is nervous of being the guinea pig. That is why we will always practice on ourselves and put up sample walls at our various factories. We ensure that the various elements are well made and teething problems sorted before marketing the product. The installation is also practiced to ensure our lifting equipment works well and no processes cause danger to anybody. Rest assured the design has been tried tested and improved before being offered to the market.
