

FORTIFIED FOR THE FUTURE

ATS Transport Raises the Bar on Security with SECURI-WALL

ATS Transport, a long-haul transport company with over 20 years of experience, is led by Justin Kent. Recently, the company installed a 570-meter-long security wall, standing 3.6 meters high - 3.3 meters above ground and 0.3 meters below. The installation was completed within just seven days. Justin chose SECURI-WALL primarily for the enhanced security it provides, noting that it instantly increased the property's value and represents a long-term investment. He was highly impressed with SECURI-WALL's exceptional service and timely delivery.

Justin is willing to provide references to future clients, confident it will influence their decisions. Additionally, insurance companies may consider lowering premiums for clients who invest in this top-tier perimeter protection system.
