TOPFLOOR

50 Mpa compressive strength concrete, combined with prestressed reinforcing and the patented SECURI-WALL solid concrete columns, offer an *unparalleled* building method for high-end warehousing and factories.

Echo and Topfloor offer a full turnkey service for the shell of the building. Finishes, plumbing and electricity are excluded.

A 315m² warehouse or factory shell can be completed in just 4 weeks!

SOME TYPICAL APPLICATIONS:

- A warehouse for high value product storage
- A factory for high value product production like jewellery, or where high value materials are used
- A small aircraft and chopper hangar
- Secure buildings for various uses like HT rooms and transformer rooms
- Barns for farming materials
- SO MUCH MORE!
