

SECURI-WALL

Leaders in High-Security Perimeter Solutions

SECURI-WALL leads in high-security perimeter solutions, specialising in durable precast concrete walls designed to withstand severe impacts and weather conditions. With the ability to install up to 450 meters of walling weekly, our efficient off-site manufacturing and precise on-site assembly ensure swift, high-quality results. Built with 50 MPa concrete and reinforced steel, SECURI-WALL walls and structures endure winds of up to 120 km/h and offer a two-hour fire rating for reliable protection. We provide customised solutions for residential, commercial and industrial clients, including mini factories, agricultural units and garages, tailored to diverse security needs.
